

# YVES YAN ESTEVES PEREIRA

Full Stack Software Engineer | Backend & Data Developer

(17) 99170-4228 yves.yan@hotmail.com linkedin.com/in/yvesesteves yves-portfolio-sepia.vercel.app Uberlândia, MG

## SUMMARY

Full Stack Software Engineer (Node.js, Python, AWS) with 9+ years of IT experience since technical high school, focused on system architecture and data intelligence. I have strong analytical skills with hands-on experience integrating Artificial Intelligence solutions (Computer Vision and LLMs) and building ETL pipelines. I have optimized technical support processes by reducing resolution times (SLA) and worked on creating scalable APIs and secure dApps. With advanced English and full adaptability to remote work, I seek to align solid software engineering with the continuous delivery of results and real business impact.

## EXPERIENCE

### IT Support Intern

#### Landix Sistemas

02/2025 - 02/2026 Uberlândia, MG

**Stack:** AWS (EC2, S3, CloudWatch), Bancos de Dados (Oracle, SQL Server, PostgreSQL), Insomnia, ERP Sankhya, Linux.

- Diagnosed and resolved critical on-premise and cloud (AWS) incidents, managing a high volume of simultaneous requests and reducing the average response time (SLA) by about 30%.
- Optimized queries in relational databases, accelerating log analysis and agilely correcting data inconsistencies in production.
- Validated APIs using Insomnia and provided direct technical support to clients, prioritizing in-depth log analysis and agile maintenance in a production environment.

### Blockchain Intern

#### Compass UOL

04/2024 - 09/2024 Remoto

**Stack:** Node.js, JavaScript, MongoDB, Solidity, Git, GitHub

- Developed REST APIs with Node.js and MongoDB, optimizing the authentication flow and improving data processing efficiency in an agile environment.
- Built and implemented Smart Contracts in Solidity with a rigorous testing process, ensuring zero failures during the deployment of decentralized applications.
- Acted in the full agile development cycle, ensuring continuous delivery and quick bug fixing.

## FEATURED PROJECTS

### 2026 World Cup Predictor

Personal Project

- Fullstack platform (Node.js/JS) for managing predictions and leagues, with 100% automated ranking and deployed on Vercel.

### Soccer AI

Personal Project

- Built an artificial intelligence pipeline focused on computer vision acting as a "virtual GPS". The system processes standard broadcast TV videos using Python to extract physical metrics and tactical positioning of players, solving the lack of high-cost tracking data.

### Palmeiras Data Analytics (BI & ETL):

Personal Project

- End-to-end BI system. Built an ETL pipeline (Python/SQLite) and a Power BI dashboard (DAX) for sports scouting analysis.

### Sistema de Votação Blockchain:

Final Project - Compass UOL Internship

- Designed a highly secure and tamper-proof decentralized voting system (dApp). Implemented Smart Contracts using Solidity and Hardhat on the Ethereum network, integrated with a Node.js and JavaScript backend to ensure total transparency, vote immutability, and process integrity.

## EDUCATION

### Bachelor's Degree in Computer Science

#### Federal University of Uberlândia (UFU)

07/2021 - Present Uberlândia, MG

### Technical Degree in Information Technology

#### Centro Paula Souza (ETEC)

02/2017 - 07/2018 Barretos, SP

## SKILLS

### Backend

Node.js APIs REST Spring Boot C#

.NET

### Frontend

HTML5 CSS3 Angular React

Flutter Tailwind

### Languages

JavaScript TypeScript Python

Java C Solidity Dart

### Databases

PostgreSQL MySQL Oracle

SQL Server DBeaver MongoDB

### Cloud & Infrastructure

AWS Linux Git Docker CI/CD

### AI & Data

Computer Vision LLMs PowerBI

DAX Prompt Engineering

### Architecture & Practices

Clean Code Agile Scrum CI/CD

## CERTIFICATIONS

### Bootcamp: Backend Java com Spring AI (54h)

NTT DATA / Digital Innovation One

### Bootcamps: Node.js Developer (50h), Ethereum Blockchain, Advanced JS/Git

Udemy

### AWS: Generative AI Learning Plans (Use Cases, Projects, Foundations), Cloud Practitioner Essentials

AWS Training & Certification

### Courses: Power BI, Claude AI & Python

Hashtag Treinamentos

### Intermediate Full-stack Javascript

Rocketseat

### English B2 (300h)

Fluency Academy

## LANGUAGES

Portuguese Native

English Advanced

Spanish Basic (A2)
