ABOUT ME

My journey in technology began in 2017 with an IT Technician course (ETEC) and, driven by my passion for the field, I am currently studying Computer Science at UFU. I have practical experience in technical support and software development, with extensive knowledge of cloud environments (AWS), incident investigation, and databases. I stand out for my analytical thinking, proactive approach to solving complex problems, and clear communication with clients. I am a dedicated professional with advanced English proficiency and a focus on continuous improvement, seeking to add value in any entry-level opportunity within the IT sector, whether in internship, junior, or trainee positions.

EDUCATION

- **Bachelor's Degree in Computer Science** - *Federal University of Uberlandia (Jul 2021 - Present)*
- **IT Technician** - *Centro Paula Souza (ETEC);*
- **English Course (300 hours)** - *Fluency Academy*

LANGUAGES

- **Portuguese** – Native;
- **English** – Advanced;
- **Spanish**- Basic

MAIN TECHNOLOGIES

JavaScript, Python, Java, C, Solidity, Node.js, Git/GitHub, HTML5, CSS, AWS, SQL Server, Oracle, PostgreSQL, MySQL, SQLite, MongoDB, Postman.

WORK EXPERIENCE

02/2025 – 02/2026 – Landix Sistemas | Estagiário de Suporte

Diagnosed and resolved critical incidents in on-premise and cloud environments (AWS: EC2, S3, CloudWatch) for global clients; Analyzed logs and manipulated databases (SQL Server, Oracle, PostgreSQL, SQLite) to troubleshoot and fix mobile application failures; Provided technical support via a ticketing system, focusing on clear communication and strict adherence to SLAs.

04/2024 – 09/2024 – Compass UOL | Blockchain Intern

Developed and maintained APIs and software projects using JavaScript and Node.js in an Agile environment; Created and authorized Smart Contracts using Solidity; Fixed bugs and implemented features focused on data security and decentralization (Blockchain).

EXTRA INFORMATION

- Teaching Assistant for Algorithms and Data Structures;
- Research and development of solutions involving data analysis;
- Fully equipped and adapted infrastructure for a 100% remote work model.
